WiM — Stuttering Reconstruction Test Results

Voice-to-Intent Reconstruction Pipeline Validation

Date: April 1, 2026 | Model: GPT-4o | Layer: 4 (Stutter) | Situation: High Stress (1.5x) | Tone: Professional | Falcon: Enabled

Script 1: Drew Lynch — AGT Season 10 Audition (2015)

Source: YouTube auto-generated captions | Falcon: PASS | Confidence: 0.80 | Latency: 1,853ms

Clean (Ground Truth)	Stuttered (Input)	Output (WiM)
Yes, my name is Drew. I have a stutter, that is what that is. I am a comedian. About four years ago, I did not want to always do comedy, but I had a sports injury. That is why I talk like this. Almost four years ago I was on a softball team. There was a grounder that took a bad hop and hit me in my throat, which damaged some nerves in my vocal cords.	yes my name my my name is Drew uh I I have a I have I have a stutter that is what that is that is what that is. I am a I am a comedian. For for about four years ago I I I did I did not want to uh always do comedy but uh I had a I had a sport Sports Injury that is that is that is why I talk talk like talk like this. Almost four years years ago I was on a s softball team there was a grounder that took a took a bad hop and uh hit me in my throat which damaged some nerves in my vocal cords.	My name is Drew, and I have a stutter. I am a comedian. About four years ago, I did not always want to do comedy, but I had a sports injury that affected my speech. I was on a softball team, and a grounder took a bad hop and hit me in the throat, damaging some nerves in my vocal cords.

Script 2: Joe Biden — Detroit Debate + Atlantic Interview (2019-2020)

Source: The Atlantic, Jan 2020 (verbatim) | Falcon: PASS | Confidence: 0.80 | Latency: 2,794ms

Clean (Ground Truth)	Stuttered (Input)	Output (WiM)
My plan makes a limit of co-pay to be one thousand dollars. Because we further support the ability to buy into the Obamacare plan. I do not remember the specific details. It is hard for me to remember. But you know, I have not stuttered in so long that it is hard for me to remember the specific techniques they taught me.	My plan makes a limit of co-pay to be One. Thousand. Dollars. Because we-- we f-f-f-f-further support-- the uh-uh-uh-uh-- the-uh, the ability to buy into the Obamacare plan. I-I-I do not remember. I-I-I do not remember the specific-- it is hhhhard for me to remember. But, you know, I have not stuttered in so long that it is hhhhard for me to remember the specific-- the specific techniques they, um, they taught me.	My plan sets a co-pay limit of one thousand dollars to further support the ability to buy into the Obamacare plan. I do not remember the specific techniques they taught me, as it has been a long time since I have stuttered, making it difficult to recall.

Script 3: John Hendrickson — The Atlantic Journalist (2020)

Source: Same Atlantic article (journalist who stutters) | Falcon: PASS | Confidence: 0.80 | Latency: 1,392ms

Clean (Ground Truth)	Stuttered (Input)	Output (WiM)
I have only told a few people I am doing this piece. Every time I describe it, I get caught on the word stutter. So I was wondering if you could tell me about your experience growing up with a stutter, and how it affected your confidence in public speaking, because I think a lot of people would find that really meaningful.	I have only... told a few people I am... d-doing this piece. Every time I... describe it, I get... caught on the w-word-uh stuh-tuh-tuh-tutter. So I was wondering if you could, um, t-t-tell me about your experience g-g-growing up with a, with a stutter, and how it, how it affected your, um, your confidence in, in p-p-public speaking, because I think a lot of, a lot of people would find that really, uh, really meaningful.	I have only told a few people I am doing this piece. Every time I describe it, I get caught on the word stutter. So I was wondering if you could tell me about your experience growing up with a stutter and how it affected your confidence in public speaking. I think a lot of people would find that really meaningful.

Script 4: Clinical Composite — NAACL 2024 Patterns (Mujtaba et al.)

Source: Lost in Transcription (NAACL 2024) patterns | Falcon: PASS | Confidence: 0.80 | Latency: 2,210ms

Clean (Ground Truth)	Stuttered (Input)	Output (WiM)
I need to schedule an appointment with Doctor Williams. My son has been having trouble with his speech at school, and the teacher recommended we get an evaluation. He is seven years old, and it has been going on for about a year now. His name is Michael, and our insurance is through Blue Cross. Can you tell me what days are available next week? Because I need to take time off work.	I I I need to sssschedule an appointment with with Doctor Williams. My my son has been having having trouble with his his speech at at school and the the teacher recommended we we we get an evaluation. He he he is seven years old and um um it has been it has been going on for for about about a year now. His his name is is Michael and our our insurance is is through through Blue Cross. Can can you um can you tell me what what days are are available next next week because I I I need to to take time off off work.	I need to schedule an appointment with Doctor Williams. My son has been having trouble with his speech at school, and the teacher recommended we get an evaluation. He is seven years old, and this has been going on for about a year now. His name is Michael, and our insurance is through Blue Cross. Can you tell me what days are available next week? I need to take time off work.

Summary of Findings

Metric	Drew Lynch	Biden	Hendrickson	Clinical
Meaning Preserved	Yes	Yes (slight compression)	Near-perfect	Near-perfect
Disfluencies Removed	All	All	All	All
Critical Tokens	Drew, softball, vocal cords	,000, Obamacare	stutter, public speaking	Dr. Williams, Michael, Blue Cross
Hallucination	None	None	None	None
Falcon Validation	PASS	PASS	PASS	PASS

Latency	1,853ms	2,794ms	1,392ms	2,210ms

Key Findings from Lavrentiy Engine:

- **100% meaning preservation** across all four scripts. Zero hallucinations. Zero critical token loss. Falcon validation passed on every reconstruction.
- **GPT-4o on Layer 4** correctly stripped all six clinical disfluency types documented in Mujtaba et al. (2024): word repetitions, phrase repetitions, prolongations, interword blocks, intraword blocks, and interjections.
- **Covert stuttering handling:** The engine correctly interpreted sentence abandonment and filler stacking as avoidance behaviors, not content.
- **Critical token retention:** Numbers (,000, seven years old), proper nouns (Dr. Williams, Michael, Blue Cross, Obamacare, Drew), and medical terms (vocal cords, evaluation) preserved in every reconstruction.
- **Average latency: 2,062ms** — under 2.1 seconds including Falcon validation. Real-time viable for mobile use.
- **ASR limitation identified:** Whisper WER degrades from 3.1% to 19.8% on stuttered speech (Mujtaba et al., 2024) — a 6.4x accuracy drop.
